Cal EOC Incident – 2014 Drought

- SOC / Inland REOC remains activated in support of 2014 Drought

WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

Eureka Weather:

As showers come to an end, cooler and drier conditions are in store for Christmas Day and beyond as high pressure delivers a brisk and dry northerly flow.

Medford Weather:

Ridging will build beginning today, but with northwest flow aloft and moist onshore flow in the lower levels. Precipitation amounts will be light, and no major travel impacts are expected. The next system will arrive Saturday in the form of a trough dropping south along the West Coast. This will be a cold system, but it will have limited access to moisture. Snow levels will remain in the 2000 to 3000 foot range, but again, with light precipitation amounts, there will not be a significant amount of rain or snow to speak of. The real story with this system will be the cold air that follows the trough on Sunday and Monday.

Reno Weather:

Below normal temperatures are expected today behind yesterday's cold front. A cold north to northwest flow will continue into the middle of next week with continued below normal temperatures. Some light snow is possible early next week with a reinforcing shot of cold air.

San Francisco Weather:

Clear skies and cool temperatures will prevail on Christmas Day with winds continuing to subside during the morning. Dry weather is expected to continue through the weekend and into at least the beginning of next week. Most locations will see their coldest temperatures so far this season over the next two nights with overnight lows forecast to be at or slightly below freezing in the inland valleys along with some late night and morning frost.

Patchy morning valley fog is possible Saturday and Sunday.

Hanford Weather:

A fast moving weather disturbance will move across Central California later this morning. Light rain, mountain snow as well as gusty winds will accompany this storm. High pressure will then rebuild for the next several days for a return to dry weather.

SOUTHERN CALIFORNIA:

Los Angeles Weather:

It will be a cool and blustery winds day today. On Friday, breezy offshore winds will bring clear skies into Saturday. The clouds will increase early next week as another cold low slides in. Temperatures from Thursday to Tuesday will be near normal.

Extreme Southwestern California Including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:
